#### **DETAILED ACTION**

This is the second Office Action for the serial number 09/751,885, Hanger for Plastic Bags and Pouches, filed on 12/29/00.

## **Priority**

Acknowledgment is made of applicant's claim for foreign priority under 35 U.S.C. 119(a)-(d). The certified copy has been filed in parent Application No. 20,019,536, filed on November 17, 2000.

### Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-8, 15, 17-24 and 31 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent # 3,707,271 to Sanchez et al.

Sanchez et al. teaches a hanger for a bag (figure 1) comprising a body (5), at least one holding strip (8), a card body (4) having at least one recess (3), and at least one film hinge (1). The card body includes a fastening surface (14). The holding strip cooperates with the body to define a gap between the holding strip and the body (figure 5 shows space between the holding strip and card body). The hanger further comprises a means for latching (19) the holding strip in a closed position adjacent to the side of

Application/Control Number: 09/751,885

Art Unit: 3632

body (figure 6). Means for latching the holding strip in a releasably and permanently latch (18) the holding strip to the fastening surface of the body. The holding strip is oriented substantially parallel to a major and minor edge of the body (figure 1). Means for latching extends through the bag that is maintained between the holding strip and the body (figure 1). The film hinge (1) is oriented in a substantially vertical position (figure 3).

Claims 9-10,16, 25-26 and 32 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sanchez et al. and in view of US Patent # 4,983,047 to Netto.

Sanchez et al. teaches means for latching but fails to teach means for latching comprising mandrels. Netto teaches means for latching comprising mandrels (9). It would have been obvious for one of ordinary skill in the art at the time the invention was made to have constructed Sanchez et al. means for latching with mandrels as taught by Netto to provide an additional security for the bag to maintain in the body.

In regard to claims 16 and 32, Sanchez et al. teaches the film hinge but fails to teach the film hinge is oriented in a substantially horizontal position. Netto teaches a film hinge (4) that is in a substantially horizontal position. It would have been obvious for one of ordinary skill in the art at the time the invention was made to have modified Sanchez et al. film hinge from vertical position to horizontal position as taught by Netto to provide a designer preference for closing the holding strip in vertical direction.

Application/Control Number: 09/751,885

Art Unit: 3632

Claims 11-14 and 27-30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sanchez et al. in view of France Patent # 2,579,174 to Ausnit.

Sanchez et al. teaches the body and the holding strip define a transverse cavity (figure 5) that receives the bag but fails to teach the bag having a closure bead. Ausnit teaches the bag having a closure bead (38). It would have been obvious for one of ordinary skill in the art at the time the invention was made to have constructed Sanchez et al. bag with a closure bead as taught by Ausnit to provide a security for an object to maintain in the bag.

### Response to Arguments

Applicant's arguments with respect to claims 1-32 have been considered but are most in view of the new ground(s) of rejection.

The examiner believes that Sanchez et al. element number 4 represents the card body. According to Merriam Webster's Collegiate Dictionary states that a "card" is a flat stuff usu. small and rectangular piece of material. Element 4 shows a flat rectangular piece of material which is considered as the card body.

#### Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alfred J Wujciak III whose telephone number is

Page 5

Application/Control Number: 09/751,885

Art Únit: 3632

703 306 5994. The examiner can normally be reached on 8am-4:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Les Braun can be reached on 703 308 2156. The fax phone numbers for the organization where this application or proceeding is assigned are 703 308 3519 for regular communications and 703 308 3519 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703 308 1113.
